

ISM300F1-C5-V0002

Single UART with NMEA-0183 Running at 4800 Bd On Port A with All NMEA Messages

- Updates position, velocity and time once per second.
- Based on the GSW3 embedded software for the SiRFstarIII™ receivers
- Eliminates the need for writing complicated code for commanding receiver-specific messages
- Ideal for high-volume, low-cost applications

Stock program features:

Baud Rate	4800
Message Protocol	NMEA-0183 Port A
Default Messages	All NMEA
SBAS/(WAAS-EGNOS)	Not Enabled
